

# C-to-C and C-to-Bayonet Mount Camera Couplers

With equivalent image quality to the Standard Series Couplers, Optem's C-mount Series eliminate the brand-specific bottom clamp for connectivity to older or more obscure-brand microscopes. C-to-C Mount Couplers offer virtually universal connectivity from male C-mount microscopes, to female C-mount cameras.

C-to-Bayonet Couplers offer the same imaging quality, economy, and universal connectivity as C-to-C Couplers but fit microscopes with male C-mount to bayonet-mount cameras. Available in magnifications ranging from 0.38X to 2.0X for imaging flexibility. Simply match a magnification to your camera format. Like the Optem Standard line of Video Couplers, these C-to-C and C-to-Bayonet couplers will accept any 21mm reticle for added imaging precision and utility.

## C-to-C mount Catalog Numbers

25-70-54-56	.....	0.38X C-to-C (1/3" format or smaller)
25-70-49-56	.....	0.50X C-to-C (1/2" format or smaller)
25-70-50-56	.....	0.67X C-to-C (2/3" format or smaller)
25-70-17-56	.....	1.0X C-to-C (1" format or smaller)
25-70-37-56	.....	2.0X C-to-C

## C-to-Bayonet Catalog Numbers

25-77-22-56	.....	0.50X C-to-1/2" SONY Bayonet
25-77-21-56	.....	0.67X C-to-1/2" SONY Bayonet
25-77-33-56	.....	0.50X C-to-1/2" Bayonet (all but SONY)
25-77-23-56	.....	0.67X C-to-1/2" Bayonet (all but SONY)
25-77-25-56	.....	0.67X C-to-F Mount Bayonet
25-77-24-56	.....	0.67X C-to-2/3" ENG Bayonet
